

Chow Chin Pang

TEL: 68784094

EMAIL: chowtommy1122@gmail.com

PORTFOLIO: <https://wppannap.github.io/portfolio/>

SKILLSET

Software: Python (pandas, scikit-learn, matplotlib), SQL (Oracle), Jupyter Notebook, Visualisation, AI tools

Language proficiency: Cantonese (native), Mandarin (native), English (fluent)

EDUCATION BACKGROUND

Bachelor of Science in Computer Science | Hong Kong Baptist University Sep 2023 – Jul 2027(Expected)

Key Courses: Data Structures and Algorithms, Database Management, Data Communications and Networking, Exploratory Data Analysis and Visualisation, Problem Solving Using Object-Oriented Approach

INTERNSHIP

Suzhou Greenhulk Bio-Tech Co., Ltd.

POSITION: IT Intern

Jul 2026 – Aug 2026

- **Logistics and inventory data recording:** Recorded and tracked raw material quantities, packaged product volumes and order numbers for a manufacturing facility producing cleaning products and pharmaceuticals, working under senior IT colleagues
- **Data visualisation and reporting:** Compiled the collected data into basic visual reports so the team could monitor factory output more easily.
- **Enterprise systems:** Learned to operate the factory's internal software systems under senior IT staff, and gained experience of cross-departmental collaboration and end-user IT support.

PROJECT EXPERIENCE

Exploratory Analysis of US Air Quality and Weather(Group project)

Mar 2026 – Apr 2026

- **Clustering:** Merged EPA county AQI data with NOAA weather data for six US counties. Applied min-max scaling and K-Means ($k = 3$) to show that similar weather does not mean similar air quality (Miami-Dade and Los Angeles are both warm but fall in different clusters).
- **PCA:** Standardised 14 air-quality indicators from the EPA county dataset and reduced them with PCA. Interpreted PC1 as general pollution level and PC2 as extreme pollution events, and visualised the results with scree plots, scatter plots and K-Means clustering.

Flight Booking Database System (Group project)

Mar 2026 – Apr 2026

- **Database and application:** Designed an Oracle relational schema (Customers, Flights, Bookings, Booking_Details) with primary/foreign key, UNIQUE and CHECK constraints, plus a trigger that updates seat availability automatically. Built a Python command-line app for flight search with connections, booking and cancellation.
- **Security and reliability:** Used parameterised queries against SQL injection and transaction rollback so a multi-flight booking either fully succeeds or fails.

TEACHING & EXTRACURRICULAR

Chinese Debate Coach / Tutor

Sep 2026 – Present

- **Coaching:** Train Chinese debate teams at Yu Chun Keung Memorial College No.2 (from Sep 2026), Shak Chung Shan Memorial Catholic Primary School (Sep–Dec 2026) and Farm Road Government Primary School (Oct 2026 – May 2027), teaching argument structure, rebuttal and public speaking.
- **Interview preparation:** Assist with the secondary-school interview preparation class at CCC Kei Wai Primary School (Oct–Nov 2026).

Member, HKBU Chinese Debate Team

Sep 2023 – Jun 2026

- Champion in the Hong Kong Intercollegiate Cantonese Debate League (2024–25). Team champions of the Inter-collegiate Debate Competition (2023–24) and the Kowloon Cup (2025–26).

实习经历

XXXXXXXX 公司 XXXXX 团队

XXXXXXXX 职位

2026.06 - 2026.08

- 选题与数据获取:** 围绕 XXXXXX 议题完成 XXXXXX 篇数据新闻, 通过 XXXXXX 渠道采集 XXXXXX 条原始数据, 覆盖 XXXXXX 个维度。
- 数据清洗与分析:** 使用 XXXXXX 工具清洗 XXXXXX 条数据, 处理缺失值、异常值与口径不一致问题, 数据可用率由 XXXXXX% 提升至 XXXXXX%。运用 XXXXXX 方法挖掘出 XXXXXX 个关键发现, 其中 XXXXXX 项成为报道核心论点。
- 可视化叙事设计:** 设计 XXXXXX 组图表与 XXXXXX 个交互模块, 将 XXXXXX 个数据结论转化为 XXXXXX 条叙事线索。针对移动端与桌面端分别优化布局, 页面平均停留时长达到 XXXXXX 秒。

项目经历

XXXXXXXXXX 项目

2024.01 - 2024.03

- 主题与信息梳理:** 围绕 XXXXXX 主题制作 XXXXXX 张信息图, 梳理 XXXXXX 个信息层级与 XXXXXX 条核心信息。
- 数据与素材处理:** 整合 XXXXXX 个来源的 XXXXXX 条数据, 完成清洗、换算与可视化映射, 确保 XXXXXX 项关键数据准确无误。建立 XXXXXX 套图标、插画与配色素材库, 素材复用率提升 XXXXXX%。
- 视觉编码与版式设计:** 采用 XXXXXX 类图表与 XXXXXX 种视觉编码方式, 将复杂信息压缩为 XXXXXX 个视觉焦点, 阅读路径清晰度提升 XXXXXX%。输出 XXXXXX 版版式方案, 适配 XXXXXX 种尺寸与 XXXXXX 个发布渠道。
